

## Aging-In-Place Remodeling Checklist

We've put together a checklist of some of things you may want to consider when converting your home to a dwelling that supports Aging-In-Place. It also provides a quick reference for various Aging-In-Place issues. As you consider your renovation, please reach out to Glickman, a certified Aging-In-Place specialist. We're here to help.

Tytakiak

<ul> <li>□ Sensor light at exterior no-step entry focusing on the front-door lock</li> <li>□ There needs to be 32-inches of clear width, which requires a 36-inch door</li> <li>□ Non-slip flooring in foyer</li> <li>□ Entry door sidelight or high/low peep hole viewer; sidelight should provide both privacy and safety</li> <li>□ Doorbell in accessible location</li> <li>□ Surface to place packages on when opening door</li> </ul>		
Thresholds		
<ul> <li>☐ Flush preferable</li> <li>☐ Exterior maximum of a half inch beveled</li> <li>☐ Interior maximum of a quarter inch</li> </ul>		
Interior Doors		
<ul> <li>□ There needs to be 32-inches of clear width, which requires a 36-inch door</li> <li>□ Levered door hardware</li> </ul>		
Windows		
<ul> <li>□ Plenty of windows for natural light</li> <li>□ Lowered windows or taller windows with lower sill height</li> <li>□ Low maintenance exterior and interior finishes</li> <li>□ Easy to operate hardware</li> </ul>		
Garage or Carport		
<ul> <li>□ Covered carports and boarding spaces</li> <li>□ Wider than average carports to accommodate lifts on vans</li> <li>□ Door heights may need to be nine feet to accommodate some raised roof vans</li> <li>□ Five-foot minimum access aisle between accessible van and car in garage</li> </ul>		

☐ If code requires floor to be several inches below entrance to house for fume protection, can slope entire floor from front to back to eliminate need for ramp or step	
□ Ramp to doorway, if needed	
☐ Handrail, if steps	
Faucets	
☐ Lever handles or pedal-controlled	
☐ Thermostatic or anti-scald controls	
☐ Pressure balanced faucets	
Kitchen and Laundry	
Counters	
☐ Wall support and provision for adjustable and/or varied height counters and removable base cabinets	
☐ Upper wall cabinetry three inches lower than conventional height	
☐ Accented stripes on edge of countertops to provide visual orientation to the workspace	
☐ Counter space for dish landing adjacent to or opposite all appliances	
☐ Base cabinet with roll out trays and Lazy Susan's	
☐ Pull-down shelving	
☐ Glass-front cabinet doors	
☐ Open shelving for easy access to frequently used items	
Appliances	
☐ Easy to read controls	
☐ Washing machine and dryer raised 12-15 inches above floor	
☐ Front loading laundry machines	
☐ Microwave oven at counter height or in wall	
☐ Side-by-side refrigerator/freezer	
☐ Side-swing or wall oven	

	Raised dishwasher with push-button controls  Electric cook top with level burners for safety in transferring between the burners, front controls and downdraft feature to pull heat away from user; light to indicate when surface is hot
V	liscellaneous
	30-inch by 48-inch clear space at appliances or 60-inch diameter clear space for turns
	Multi-level work areas to accommodate cooks of different heights
	Open under-counter seated work areas
	Placement of task lighting in appropriate work areas
	Loop handles for easy grip and pull
	Pull-out spray faucet; levered handles
	In multi-story homes, laundry chute or laundry facilities in master bedroom
В	athroom
	Wall support and provision for adjustable and/or varied height counters and removable base cabinets
	Contrasting color edge border at countertops
	Contrasting color edge border at countertops At least one wheelchair maneuverable bath on main level with 60-inch turning radius
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250-300 pounds  If stand-up shower is used in main bath, it is curbless and minimum of 36-inches
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250-300 pounds  If stand-up shower is used in main bath, it is curbless and minimum of 36-inches wide
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250-300 pounds  If stand-up shower is used in main bath, it is curbless and minimum of 36-inches wide  Bathtub – lower for easier access
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250-300 pounds  If stand-up shower is used in main bath, it is curbless and minimum of 36-inches wide  Bathtub – lower for easier access  Fold down seat in the shower
	Contrasting color edge border at countertops  At least one wheelchair maneuverable bath on main level with 60-inch turning radius or acceptable T-turn space and 36-inch by 36-inch or 30-inch by 48-inch clear space Bracing in walls around tub, shower, shower seat, and toilet for installation of grab bars to support 250-300 pounds  If stand-up shower is used in main bath, it is curbless and minimum of 36-inches wide  Bathtub – lower for easier access  Fold down seat in the shower  Adjustable/handheld showerheads, 6-foot hose

☐ Toilet two and half inches higher than standard toilet (17-19 inches) or height-adjustable
☐ Design of the toilet paper holder allows rolls to be changed with one hand
<ul><li>□ Wall-hung sink with knee space and panel to protect user from pipes</li><li>□ Slip-resistant flooring in bathroom and shower</li></ul>
01 . 1 . 1 . 1
Stairways, Lifts, and Elevators
☐ Adequate hand rails on both sides of stairway, one and a quarter inch diameter
☐ Increased visibility of stairs through contrast strip on top and bottom stairs, color contrast between treads and risers on stairs and use of lighting
☐ Multi-story homes may provide either pre-framed shaft (i.e., stacked closets) for future elevator, or stairway width must be minimum of four feet to allow space for lift
☐ Residential elevator or lift
Damne
Ramps
<ul> <li>□ Slope no greater than one inch rise for each 12-inches in length, adequate handrails</li> <li>□ Five-foot landing provided at entrance</li> </ul>
☐ Two-inch curbs for safety
Otawa wa
Storage
☐ Adjustable closet rods and shelves
<ul><li>☐ Lighting in closets</li><li>☐ Easy open doors that do not obstruct access</li></ul>
E Lasy open doors that do not obstruct access
Electrical, Lighting, Safety, and Security
☐ Light switches by each entrance to halls and rooms
☐ Light receptacles with at least two bulbs in vital places (exits, bathroom)
☐ Light switches, thermostats, and other environmental controls placed in accessible locations no higher than 48 inches from floor

	Electrical outlets 15-inches on center from floor; may need to be closer than 12-feet apart
	Clear access space of 30-inches by 48-inches in front of switches and controls
	Rocker or touch light switches
	Audible and visual strobe light system to indicate when the doorbell, telephone or smoke or CO2 detectors have been activated
	High-tech security/intercom system that can be monitored, with the heating, air conditioning and lighting, from any TV in the house
	Easy-to-see and read thermostats
	Pre-programmed thermostats
	Flashing porch light or 911 switch
	Direct wired to police, fire and EMS (as option)
	Home wired for security
	Home wired for computers
F	looring
	Smooth, non-glare, slip-resistant surfaces, interior and exterior  If carpeted, use low (less than a half inch high pile) density, with firm pad  Color/texture contrast to indicate change in surface levels
Н	eating, Ventilation, and Air Conditioning
	HVAC should be designed so filters are easily accessible Energy-efficient units
	Windows that can be opened for cross ventilation, fresh air
Ε	nergy-Efficient Features
	In-line framing with two by six studs spaced 24-inches on center
	Air-barrier installation and sealing of duct work with mastic
	Reduced-size air conditioning units with gas furnaces

	Mechanical fresh air ventilation, installation of air returns in all bedrooms and use of carbon monoxide detectors Installation of energy efficient windows with Low-E glass			
R	educed Maintenance/Convenience Features			
	Easy to clean surfaces  Central vacuum  Built-in pet feeding system  Built-in recycling system  Video phones  Intercom system			
Other Ideas				
	Separate apartment for rental income or future caregiver Flex room that can used as a nursery or playroom when the children are young and as a home office later; if combined with a full bath, room could also be used for an aging parent/aging in place
